

# SMART SHOT Film Splicer

A simplified approach to film splicing! Source Two's SMART SHOT is a versatile, semi-automatic heat seal film splicer. Its compact design and ease of use makes it a popular choice for most types of photo finishing labs. SMART SHOT offers automatic film positioning and splicing, and is virtually maintenance free.

The Smart Shot is your solution as a pre- or post-splicer for low volume requirements, repair splicing, long roll printing and scanning, specialized rolls, and many other uses. If you need to splice film, you need to consider SMART SHOT!

## FEATURES

- 1" wide heat splice tape
- Edge-to-edge film splices (on select models) for maximized splice integrity
- *NEW* High Endurance Splice Pad Technology (HESP)
- Simple film loading and format changeover
- Economical performance with low maintenance requirement
- Eliminates staples; saves your squeegees!
- Durable film to leader splices

## DIMENSIONS

- Length-9.5" (24cm)
- Width-10" (25cm)
- Height-11.6" (29cm)

## SPECIFICATIONS

- Electrical: 120/220 VAC, 50/60 Hz.
- Pneumatic: 1 cfm at 80 p.s.i.

## VERSIONS

- ANY single or dual versions for film formats up to 70mm (16mm, APS, 35mm, 46mm, 120/220, 70mm)
- Dual 16mm/35mm (optimized for motion picture labs)
- 24mm APS (optimized to APS specification)
- Edge-to-edge splice models
- Conventional "butt" splice models

## OPTIONS

- Manual film trimmer
- Low tension take-up mechanism
